ONE TIME FOR ALL

Daylight saving time went into effect in Didsbury last Sunday, as well as in most towns and cities in Alberta, and while the change has been appreciated by townspeople it has not met with the same general enthusiasm in the country.

The C.P.R. remains on standard time and cannot very well adopt the new time without changing all its schedules. Should they make the change it would not be accurate in the many places in the province and Dominion which remain on standard time. With the railways on old time, the postoffices must necessarily follow this course, and the time question has become very confusing.

If the average citizen or household wants to keep track of trains, mail school hours, government office hours and store hours he will have to carry two watches or have two clocks in the home, one set for standard time and the other for daylight saving time.

What a mess—particularly when there is no need for it. The whole question could be settled once and for all if our federal government would either pass a law making daylight saving time compulsory all over the Dominion, or else make it illegal to adopt fast time.

It may be good politics to keep passing the buck to local governments and municipal bodies, but it is certainly not good government when our elected members cannot get together and legislate for the common good of the whole Dominion of Canada—particularly on such a vital question as "time."

OUR NATIONAL HEALTH

Fear of disease and untimely death has been perhaps the greatest scourge of humanity and perhaps few realize the extent to which the need for this fear has been conquered by medical science. One by one the dread diseases such as diphtheria, smallpox and tuberculosis have been brought under control until today only one prevalent disease, cancer, seems to defy all efforts and has rightly become the concern of all modern governments.

The Federal Minister of National Health and Welfare, Hon. Paul Martin, dramatically outlined the extent of the problem when he showed that deaths from cancer among Canadians was more than double our losses from war in the same period. He has declared a state of "total war" on the disease.

To aid in the "total war" an appeal for donations is being made to the citizens of Didsbury and district by Mons Chapter I.O.D.E. and all Women's Institutes. As this is a worthy cause you are urged to contribute to the campaign when you are approached by a canvasser.

SUN-GLASS USE

The best medical advice is against use of sunglasses for night driving. Doctors say they will just provide an additional hazard. In the first place, sunglasses should not change the hues of natural colours, and their indiscriminate use tends to lower tolerance of the eyes for light.

Unless an eye-specialist has specially advised them, sunglasses should be worn, if at all, only during periods of exposure to sunlight.

A stout woman drove up to a filling station: "I want two quarts of oil," she said.

"What kind, heavy?" asked the attendant.

"Say, young man, don't get fresh."

J.J. ZUBICK TO SPEAK TO WALTHER LEAGUE, MAY 20

Mr. J.J. Zubick will be the guest speaker at the next Walther League meeting, to be held at the Lutheran Church in Didsbury on Tuesday, May 20, beginning at 8 p.m. The general public is most cordially invited to attend this meeting. The topic which Mr. Zubick has chosen is "Germany Under Control." Mr. Zubick will deal critically with the administration of the British zone of occupation.

Mr. Zubick is a veteran of both wars. During World War II he served principally as intelligence officer in the prisoner of war camps in Canada and also in Military Intelligence at N.H.Q.

When Germany capitulated he was "loaned" to the British army for service with a British information control unit in Germany. Here he served the first nine months as officer commanding the press detachment in Flensburg, where he published three newspapers in the German language. No Germans were licensed to publish their own newspapers.

While in this office he was promoted to Major and given the post of Press Chief with H.Q. in Hamburg. His main task for about four months was the administration of official British policy through the 13 German newspapers in the province of Schleswig-Holstein, and in general the building up of a democratic German press.

At present Mr. Zubick is on tour in Alberta speaking to various organizations. He cordially invites the general public to attend these lectures.

THE CAMPAIGN FOR WHEAT

Seeding time is here once again. Farmers on the great stretch of land in Western Canada extending nearly 1,000 miles from the Rocky Mountains in the west to beyond Winnipeg in the east are now on the land in a late spring. Their job is to seed some 43 million acres to grain, of which about 25 million acres will be in wheat.

This 1947 crop is of exceptional importance, not only to Canada but to the whole world. Food is scarce everywhere. Unfortunate Europe, not yet recovered from the chaos of war, is laboring under the additional handicap of a bad winter during which fall-planted grain crops suffered heavily. World reserves of food have diminished to the danger point. Famine is a constant threat in many lands.

A good crop in Western Canada would restore confidence of a greater degree of security to hundreds of millions of people. The United States is now assured of a very large wheat crop, possibly 1½ billion bushels. An additional wheat outturn of around 450 million bushels from Western Canada would aid materially in banishing the spectre of world hunger.

Last year the prairie provinces of Canada seeded 25 million acres to wheat. The objective for this year is a similar acreage. Rains last autumn and heavy snows during the winter provide ample moisture over most of the region to give grain a good start. What happens from now on depends on the rainfall in June and July.

DON'T LET COYOTES REDUCE YOUR LAMB CROP

Now that the lambing season is here serious consideration should be given to providing protection from predatory animals. A. J. Charnetski, Live Stock Supervisor, says that coyotes cause severe losses to the careless sheepman, and in the parkland areas at least, night folding of the flock is imperative.

The use of a good rifle and a steady eye in the early morning or just before dusk will make it heat-

WESTERDALE NEWS NOTES

The Didsbury boys' softball team journeyed to Westerdale on Monday last to play the local boys a game of softball. The game resulted in a win for Didsbury by a score of 25-4.

Mrs. Ted Bolton spent Sunday last visiting friends at Water Valley.

Mr. Bill Coleman is doing some painting for Mr. Ben Kershaw.

Mr. L. Jones is doing carpenter work again at the home of Mr. Bill Turnbull of Harnattan.

Mr. and Mrs. H. Jackson, Barbara and Arthur, and Mr. and Mrs. F. Jackson and Phyllis were Sunday guests at the home of Mr. and Mrs. J. Bothers of Innis Lake. Tommy and Donny Jones returned home Saturday after spending the past three and a half weeks with their grandmother who lives at Blairmore.

BERGEN AND NICHE VALLEY

A good soaking rain fell on Thursday night.

Enid Mielness is planning Lyle's lumber on the old McKnight place.

Jake Glaum has been at Bergen looking after the Atlas lumber piled six miles west of Bergen.

Bill McCormick has had some lumber sawn from his own place. Mrs. Anderson of Calgary is visiting with her daughter, Mrs. Leonard McKelborg.

Rev. A. Habermehl placed a hospital bed in the home of Mrs. Brook, who has been bedridden for some time. The bed is a contribution from the Eldsvid and Bergen people, and is to be loaned in the immediate community.

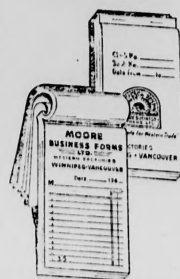

John Haug and Rev. H. Robinson have gone to Chilliwack to attend the Bible School closing and the annual P.H. camp meeting.

Harvey Burgess and the Baer Bros. often haul six trucks of lumber from here in a day.

Thier for predatory animals to seek food elsewhere. Younger members of the family with their natural urge to grow and older, should be encouraged to locate coyote dens so that both pups and older animals may be destroyed.

The Fish and Game Commissioner of the Department of Lands and Mines will gladly issue free permits to those who wish to snare coyotes on their own property. There is a year round open season on these animals and with the help of his family the owner can do much toward protecting his young livestock from destruction.

FIFTH PATRONAGE DIVIDEND

to

PIONEER CUSTOMERS

Within the next two weeks we will distribute a patronage dividend to customers who made deliveries for the season 1944-45. Therefore, if you made any grain deliveries to us during that season, kindly get in touch with our agent for further particulars.

We have previously distributed patronage dividends to our customers for the seasons 1941-42; 1942-43; 1943-44; 1945-46.

It is also our intention to distribute a patronage dividend for the season 1946-47 if our earnings permit.

We are constantly adding new job and ad type to our plant, and are thus enabled to turn out better and more modern printing.

Check over your supplies now, and if there is anything in the printing line you need, give us the order immediately, and do not wait till you are down to the last letterhead or envelope.

THE DIDSBURY PIONEER

PRINTERS & PUBLISHERS

ON SOWING FLAX

An increased acreage of flax is indicated for Alberta in 1947, and those who have had little previous experience with this crop may have difficulty in settling the drill for efficient seeding.

As a general recommendation, officials of the Field Crops Branch suggest that 28 pounds or one-half bushel of seed per acre will be sufficient. On the open prairies of Southern Alberta where the larger seeded Bison is grown, somewhat less seed can be planted. The larger seed of Bison with its fewer seeds per bushel, will itself allow for lighter seeding in the drier sections of the province. Under irrigation the rate might be increased to 40 pounds per acre. In central and northern Alberta 28 to 35 pounds of Redwing usually results in a satisfactory stand.

Before starting to plant, the seed drill should be carefully checked. If there is any variation in the flow of seed between spouts, adjustments should be made. Small flax seeds flow like water and what might have appeared as minor differences in the rate of seeding between drills with cereals may be a major problem in planting flax. It would be well to try out the drill with a paper bag tied on each spout to ensure uniform planting so that adjustments can be made.

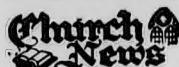

CANADIANS MUST FILL OUT FORM FOR U.S. CURRENCY

The Foreign Exchange Control Board said Canadians drawing any United States money from Canadian banks now had to fill out a form.

Previously a Canadian going to the U.S. on a visit could draw up to \$100 in U.S. currency without any formalities. Any additional "reasonable amount" could be obtained by getting a permit from a bank.

The board said the new step had been taken because it had been found that some persons were going from bank to bank, drawing up to \$100 from each so that their final total was well beyond the \$100 limit.

The story of the late Emily Carr, great Canadian artist, and her canvases are the subject of a National Film Board production in 16mm. The title is "Klee Wyck".

PLAYING BALL

(By Edna Jaques)

One of the age-old reasons that gossip never grows stale is because it deals with people, their loves and hates, success and failure, honor or disgrace.

We love to talk about folks we know, their business is ours, we rejoice over their triumphs, and we are sorry when trouble overtakes them.

Mr. Lucky-strike may find a diamond mine in Timbuctoo that makes him the richest man in the whole world, but when Mamie Gamble flashes a fifty dollar sparkler on her engagement finger half the town is agog and Mamie is right up in the news for weeks on end. Human nature plays a big role in affairs and with the lifting of price ceilings on many commodities it is interesting to sit back and watch what happens, for with the lifting of many controls old human nature is being tried once more on the stage of national life.

With the lifting of controls on leather footwear everyone looked for a swift rise in prices. Just to confound the wise an Ottawa paper came out with a big advertisement that read "we announce there will be no increase in our prices," adding a fine promise that their prices would reduce when conditions permit—that gave us a new lease on our faith in folks.

The next page carried another ad, "despite the removal of price ceilings on soft drinks we are pleased to announce that our price remains unchanged," another notch in our estimate of our fellow man.

In other words, these firms were "playing ball" with their customers doing the right thing. The good news doesn't stop here, for many business houses are announcing there will be no increase in their prices.

Across the Line, President Truman is appealing to business men to keep prices at a reasonable level, warning them that if prices keep rising like they are, labor would have every right to demand higher wages. He says "business men wanted free enterprise, now they have it, it is squarely up to them to force prices down," which is mighty good reasoning from the President.

Business men all across Canada are being urged not to follow any general pattern of price increases upon removal of government controls in their particular lines of business. In easing controls and reducing subsidies it is recognized that some increases would occur but the Government is relying on business leaders to restrict and control increases in every way possible.

This is a testing period for business, no sane merchant is going to begin a private war of his own and start prices sky-rocketing, he has to live in his community too. Keen business men are more and more aware of the responsibility of freedom and are not likely to gamble with the future of their business.

The picture of 1921 still looms darkly upon the horizon when more than ten thousand business houses went to the wall when the crash came after sky-rocketing prices bust.

The fact that people from coast to coast are urgently asking that controls be kept on the main articles of everyday living is proof of the success of a price control policy, that has ensured for Canada one of the lowest cost-of-living rates in the world.

TREES FOR FARMERS

From the Forest Nursery Stations at Indian Head and Sutherland, Sask., 200,000,000 trees had been distributed up to and including the Spring of 1946 at the rate of approximately 1,000 trees to 4,000 farmers each year in the case of broadleaf trees, and 5,000,000 evergreen trees to 800 planters at the rate of approximately 200 trees each year.

Classified Ads Will Sell Your Goods

GRAIN PRODUCTION

In 1930, it required about 57 man-hours of labour to produce an acre of wheat. The development of

efficient machinery has reduced this figure to about 2.5 man-hours. Additional improvements, says the man-hours of labour to produce an Aaricultural Institute Review, will result in still cheaper production.

ADVERTISE REGULARLY IN "THE PIONEER"

MONTHLY REPORT FROM OTTAWA

(Continued from front page)

that the greatest good was accomplished. Others deplore the failure to increase tax exemptions for both married and single persons. There are many who feel that indirect taxes, sales and excise, should have been slashed to reduce living costs and bring relief to those thousands including pensioners, widows, and non-tax paying low income groups who now struggle under rapidly increasing living costs.

Since the commencement of the session members of all parties have received numerous letters, petitions and telegrams urging effective consideration on behalf of our pioneer citizens. Interest was greatly stimulated when a government resolution respecting Old Age Pensions appeared on the Commons' Order Paper. This resolution declares that it is expedient to introduce a measure to amend the Old Age Pension Act to provide for increase in pensions and incomes allowable to pensioners, and to modify certain eligibility requirements. Members themselves will not know how far the amendments will go until the Bill is introduced. While a reduction in the eligibility age and the removal of the means test are possibilities, it is not generally believed that this will occur at the present time. Parliament will accept any improvement in the present act but it is a certainty that from all quarters of the Commons will come further demands for a lower qualifying age, a pension of at least fifty dollars and the removal of the means test.

Human Rights - Fundamental Freedoms

The Commons Order Paper reveals a resolution sponsored by the Prime Minister. This resolution calls for the setting up of a joint committee of the Commons and Senate to consider the question of human rights and fundamental freedoms, and the constitutional situation in Canada with respect to such rights, and what steps, if any, it would be advisable to take or to recommend for the purpose of preserving in Canada respect for and observance of human rights and fundamental freedoms. It is believed that this action was taken because of two things: A move on the part of the Economic and Social Council of the United Nations in establishing a Commission on Human Rights, and recent actions in Canada in connection with British

subjects of Japanese origin, the legal procedure in the recent espionage cases, and certain charges respecting religious persecution. This Committee will, undoubtedly, turn out some interesting evidence.

Immigration has been the subject of heated debate in the House of Commons. Roughly speaking, opinions expressed fall into three groups: (1) Canada should open her doors to immigrants without regard to race. (2) Canada should be retained for Canadians. (3) Canada should have a selective immigration policy. Admissible persons should consist of only those who can be assimilated and who appreciate the democratic way of life.

Most members support those last group. This week Prime Minister King announced Government policy respecting immigration. This policy falls into two parts: Measures designed for immediate application, and the long-term policy. Immigration officials are to proceed to Europe immediately to examine refugees in the mind of the government, and to admit thousands of their numbers. All Europeans who are now admissible under current regulations may bring their families to Canada with them. There is to be no large influx of orientals, and Japanese immigration is to be prohibited. Most M.P.s. recognize the need for thousands of immigrants. However, there does exist a strong feeling that careful selection is essential, for the issue is to be no fundamental change in the character of our population.

CONDITIONS IN EUROPE

(By H.G.L. Strange)

We have heard in recent months contradictory reports about whether the people of Britain and Europe were well or poorly fed, about whether Britain and other countries were rapidly reviving, or whether they were slipping further back, and about what the chances were for Canada to sell wheat and other products to Europe in the future. The Searle Grain Company, therefore, sometime ago decided to send me to Britain and Europe to observe at first hand just what the conditions were.

After some seven weeks away I have now returned with many vivid impressions about what I saw and heard in those countries. For the benefit of the readers of this "World of Wheat" column, I will relate from time to time what I have seen, and I will take the liberty of making suggestions which I think should be adopted in order to help Europe once again to resume her rightful place as the greatest market for Canada's products. The most vivid and first impression I wish to convey is that Canada is the best country in the whole world in which to be living today. Our people are far better fed than those in Europe and the opportunities here for success, for prosperity and advancement, are miles and miles ahead of any opportunities in Britain or in the other countries of Europe.

INCREASED PRICES ON ALL DAIRY PRODUCTS

Following the recent government announcement that the producer butterfat subsidy amounting to eight and one-half cents per pound for butter would be cancelled, the W.P.T.B. declared the ceiling on creamery butter would be increased by 10c per lb. at all trade levels, effective May.

This action follows overall government policy in removing subsidies and transferring these subsidies into price. The 15c price increase over and above the actual amount of the subsidy is given as an encouragement to greater butter production. It was stressed in the announcement that the Wartime Prices and Trade Board regulations do not allow retailers to increase the price of butter to consumers on stocks held in the store at the close of business April 30. At the same time the Board announced that in order to maintain the producer price relationship, two cents per pound will be added to the ceiling prices of both dairy and whey butter, to become effective on the same date.

There is also an increase of three cents per pound at the manufacturers' level in the ceiling price of cheddar cheese in order to replace the subsidy paid on this product. This will mean an average increase to consumers of approximately four cents per pound.

Also at the same time the ceiling price on evaporated milk was raised by 30c per case (48 - 16 oz. tins), and this will mean an increase to the consumer of one cent per tin.

PRINCE RUPERT TO HAVE GREAT INDUSTRY

The Vancouver Province says: Prince Rupert, which was described in the Legislature as a "neglected city," is to have a great industry.

The Provincial Government has persuaded the Celanese Corporation of America to establish a plant on Watson Island, eight miles from the city, and to spend \$15,000,000 on building and equipment. Approximately 1,000 men will be employed in the woods and the mill.

An interesting feature of the bargain is the corporation's undertaking to maintain the forest area allotted to it in perpetuity.

THINGS ARE VERY DIFFERENT NOW

The News-Letter Orillia, Ont., tells this story: The first issue of the Orillia Expositor, published in 1867, was a four-page, six column newspaper. The advertisements show how the cost of living has increased. Men's suits, for instance, were advertised by both the Mulcahy and Co. and Frank Kean's drygoods at \$2.50 each. O'Brien and Co., another well-known Orillia store of the period offered the best quality bacon at 10 cents per pound, while a women's store advertised ladies' French gaiters at \$1 each. Cost of beverages was not all correspondingly cheap, the advertisements showed. Tea for instance, was \$1 a pound. Whisky, "the best domestic brand made," was offered at 75 cents a gallon.

FOX HATCHED

Now is the time to order while we have them. Only a few thousand of each breed left as there will be no chicks hatched in Alberta after June 6. Rising meat and egg prices make chicks a profitable idea.

Postes organise for search in Alberta rural centres.

The dragnet for E. B. Bottles, alias "Empties", widened today as search extends to Alberta's many towns and villages.

E. B. Bottles, commonly known as Empty Beer Bottles, became the subject of this intensive hunt following disappearance from essential duty in the bottling and brewing industry. Citizens are co-operating in an all-out effort to see that this culprit is brought to justice and returned to work so that the demand for Brewery products can be met.

It is believed that "Empties" may be lying low in basements, closets, attics, garages, or other places about the home, and for this reason, the co-operation of housewives in aiding the search is particularly requested.

CASH REWARD OFFERED

Housewives in cities, towns, and villages are urged to search their premises throughout. In the event of apprehension, Deliveries Limited should be notified at once. They have arranged to take "Empties" into custody—pay 20 cents per dozen cash reward on the spot and provide escort to the nearest bottle depot.

Rural citizens who may come across "Empties" can have them escorted, freight collect to the nearest Deliveries Limited depot, and cash reward will be mailed immediately he is in custody. Depots are located at Camrose, Banff, Calgary, Edmonton, Camrose, Medicine Hat, Drumheller and Lethbridge. McLean is nearest depot for Peace River District.

Roofs and Eavestroughs
Wear Years Longer
with
IMPERIAL ROOF PUTTY FLUX

► This liquid asphalt has many uses on the farm. Easy to apply, it coats your roofs and eavestroughs with a hard, tough, weather-proof surface that is fire-resistant. Cracks are filled, rust and leaks prevented. Imperial Roof Putty Flux has unusual filling, sealing and coating qualities that protect surfaces, prolong life, and save on repairs. Here are some of its many uses:

- Protects metal and felt roofs and eavestroughs.
- Preserves bases of granaries and granary slides.
- Waterproofs troughs and eavestroughs.
- Preserves fence posts and well casing.
- Waterproofs cement foundations.
- Caulks window frames.

SOWING OATS

Yields of oats can often be increased by early seeding. This is pointed out by the Lethbridge Experimental Station, which mentions that the driest period of the summer generally occurs about the

first week of July. If oats are sown almost as early as wheat they have a good chance of being fairly well developed when this drought period arrives. In the Lethbridge district it takes oats about 110 days on the average to mature.—Wheat Pool Budget.

-: DISTRICT NEWS:-

BURNSIDE NEWS NOTES

Gus Bittner is a patient in the Didsbury hospital, following an appendix operation, and we wish him a speedy recovery.

Miss Clare Wood of the Didsbury school teaching staff spent the week end with her mother in the district.

George Campbell of the Carstairs district met with a painful and serious accident last week when he fell from a grader and broke a pelvic bone. Apparently George was going for the cows and as the grader was passing he jumped on. The grader hit a bump in the road and he fell off, causing serious injuries. George was taken to the Didsbury hospital and will be a patient there for some time.

Mr. and Mrs. Manderville of Drumheller and Mrs. Neilson and daughter, Vera, were visitors at the Page home Sunday.

George Gibson and Bill Persinger have purchased an acre of land from Walter Scheidt and will build a service station and coffee shop on the property, which is situated just opposite the Hiway Service station on the highway east of Didsbury. A bulldozer is at work on the acreage, putting in a road-way and preparing the land for the new building.

Walter McCulloch hired a couple to work at his farm about a month ago, and not proving satisfactory he discharged them and paid them in cash. They went to Didsbury and forging a \$45 check in Walter's name, cashed it at one of the local stores. The bank however, refused to honor the check and an endeavor is now being made to apprehend the culprits.

NOTES FROM THE WEST

The Elkton Willing Workers met at the home of Mrs. Gordon Befus Thursday with 12 members present. The garments for the layette to be sent overseas were handed in to the secretary and Mrs. Gillies was asked to purchase two baby blankets while in Calgary, to complete it. It was decided to hold a picnic with a sewing stall on July 16th, further plans and the place where it will be held to be decided at the next meeting. The next meeting will be held at the home of Mrs. O. Blain when a quilt will be tied to raffle at the picnic, with the idea of raising funds to carry on the work. \$5 was donated towards prizes for the school picnic. Mrs. A.L. Hogg, who expects to be away during the summer months, was presented with a box of stationery and a bottle of perfume, with the best wishes of the members for a pleasant trip.

Mrs. D. Hosegood and children returned home on Sunday after spending a few days with her parents, Mr. and Mrs. Monck, in Calgary.

Owing to the lack of room in the hospital, Mrs. A.L. Hogg went to Didsbury to the home of Mrs. Sproule to take care of Norman, who is suffering from pneumonia and who was admitted to the Didsbury hospital on Saturday afternoon. Who said the Didsbury hospital was too large for the community?

Mr. and Mrs. E. Fisher visited the latter's parents, Mr. and Mrs. F. Byrt, on Sunday.

Mrs. J. Hosegood was a supper guest with Mr. and Mrs. A. McInnis on Sunday.

Mr. and Mrs. C.S. Hogg moved into Didsbury Thursday last, where Colin is working with Mr. Cunningham.

Congratulations to Mr. and Mrs. Albert Krebs—its a boy.

Mrs. Block and daughter of Didsbury spent the week end with Mr. and Mrs. O. Thompson.

The Elkton ball players travelled to Melvin Sunday afternoon, losing by a score of 7-4.

Mr. E. Cogswell, who has been a patient in the Didsbury hospital, was able to return home last Friday.

SHIELD BABY EYES

Even when a baby is old enough for sunbaths, the eyes should be given special protection, say the health authorities. An infant should be shielded from direct rays of the sun until able to move about easily. Doctors suggest that the baby be placed with feet pointing away from the sun, so that eyebrows and upper lids shield the eyes. It is also a good idea to line the hood of a baby carriage with some dull, preferably dark material.

NOTES FROM THE EAST

Ernie Cullen and son Bob, Howard Persinger, J.D. Thomas and son Ronald, Ernie Sutton of Didsbury, and Harold Davis of Sunnyslope, were all visitors last week with Fred Metz and Mrs. Dowell.

Bill Persinger made a special call on Councillor Metz on Sunday, but we believe there was another attraction which was the real reason for his visit.

Albert Milne was also seen going across the field, looking towards Fred's house. Seems as though the new teacher has been causing some attraction.

Mrs. D.B. Wood entertained several visitors on Mother's Day. Mrs. Lynn Hunsperger and daughter, Sharon, being among those present. Miss Esther Ehret of Didsbury spent the week end at her home in the district.

Joe Perrault and Fred Metz were in Calgary last Tuesday on municipal business.

Mrs. Bob Eckel spent Sunday with Mrs. George Campbell, giving a helping hand in George's absence at this busy season.

Mrs. Dowell, Mrs. Pete Schumaker, Mrs. Ivan Weber, Mrs. J. Underhay, Miss Olyvyn Hughes and Mrs. H. Shells, together with Fred Metz and Pete Schumaker, were afternoon tea guests with Mrs. Coates on Friday last. Some of the guests carefully wrapped their sample of Mrs. D.L. Fabes' wedding cake to take home to dream on. But Fred said, "Oh, gee, I forgot to dream of my future fiancée." If Fred doesn't look about it will be too late. We suggest that he get another piece of wedding cake and try it again.

There was an earthquake in a South American town which badly scared the inhabitants.

An English family who lived there sent their little son to stay with an uncle in another district for safety's sake.

Two days later the parents received the following telegram:

"Am returning your boy. Send the earthquake."

—I wish to announce that once more Animal Builders is available and is now in stock. Harold E. Oke, phone 10, Didsbury. 21c

Mr. and Mrs. Brian Johnson had a letter from their son Clarence, who is working for a placer mining company near Dawson City, Yukon. He says the men work seven days a week and everything but the bulldozer is run by electricity. They are working on an old creek bottom that was dredged about 40 years ago, and to get to the bottom of the gravel bed, down about 30 to 40 feet, the ground, which is always frozen, has to be thawed out with steam.

CLOCK SWITCHES ON RADIO

An accessory which will be seen at the British Industries Fair is the "Present" clock device which, when set at the required time, will switch on the radio at any moment desired and switch it off when the selected programme ends. It can be added to any AC radio set.
